NovaPED CARBON STRONG

by **schein**

Novaped carbon foot orthotics with full reinforcement are specially designed for further processing into an orthopedic foot orthotic for treatment suitable after an operation / metatarsal fractures / marching fractures.

The stiffening carbon element is narrow, the cover is wide, therefore the orthotic can be optimally fitted into different shoes, without damaging the carbon.

Item no.	Description	Size
983250000	NP carbon strong base left universal	35–48
983150000	NP carbon strong base right universal	35–48
983240000	NP carbon strong compensation insole base left narrow	35–48
983140000	NP carbon strong compensation insole base right narrow	35–48
983245000	NP carbon strong compensation insole base left wide	35–48
983145000	NP carbon strong compensation insole base right wide	35–48
962189000	Top covers 2 mm p ² resorb black, laminated with OnDry black perforated, loose anatomically shaped rubber pad (3470)	I 35-39 II 40-46 III 47-48
